2 Connecting and switching on

Note: For trouble-free signal reception your antenna and cable installation should be calibrated and inspected by a qualified professional with a digital TV-level-measuring instrument.

- Connect the receiver using **HDMI cable** via the HD OUT output port to your TV's HDMI input port
- Then connect the coaxial cable from the terrestrial antenna to the **ANT IN** input of the receiver.
- Insert the batteries into the remote control. Notes on the remote control can be found on the back of these instructions.
- Connect the receiver to the power supply.
- The receiver starts with the BOOT process and is operational within a short time

After the first start, choose your language

-  **Activates the menu "Subtitle/teletext"**
-  **Web TV key**

MANUAL INSTRUCTION FOR LEARN EDISION UNIVERSAL REMOTE CONTROL 2in1

Your set-top-box remote control has 4 learning-function keys, in the up right hand side TV keypad panel area. Each one can be used accordingly as the following example:

1. Turning your TV set ON/OFF **[SET]**
2. Increasing/decreasing volume **[VOL+ , VOL-]**
3. Switching between TV/AV mode **[TV/AV]**

The other 39 keys are for the control of the EDISION set-top-box.

SET UP FOR LEARNING FUNCTION

- Press **[SET]** key in the up right hand side TV keypad panel area continuously for 5 Sec. until the LED lights up and keep lighting, then release the key. This means the remote control is in the learning mode.
- Within 10 seconds, press the key in the original TV IR control, which needs to be learned, for example the **[POWER]** key, then the red LED is flashing. It means this button is ready to receive the learning signal.
- Aim the emission port of the original TV remote control at the front at the emission port at the front of your set-top box remote control (distance between these two ports has to be about 2~3 CM).
- Then press the key which is to be learned in your original TV remote control, for example the **[POWER]** key of your original TV remote control continuously for 3 seconds. If the red LED flashes quickly for three times and keep lighting, it means the set-top box remote control has succeeded in receiving the signal and you have completed the learning procedure of ON/OFF **[TV POWER]** key.
- Then release the **[POWER]** key of your original TV remote control.

If the copying procedure fails, the red LED will blink and stay OFF. In this case please repeat the procedure.

For the next programmable function, please repeat steps 1 to 2:

- Switching between TV/AV mode **[TV/AV]**
- Increasing/decreasing volume **[VOL+ , VOL-]**

Now you can operate your TV with the 4 programmed by you keys of your set-top box remote control.

During the operation, the LED will flash to indicate that the signal is transmitted!
