

# HDMOD-6S

## Quick start guide

### 4-step installation guide

The HDMOD-6S can be programmed on the field using the following simple 4 steps\*:

#### 1<sup>st</sup> Step

Power up the HDMOD-6S by adding the external power supply. The HDMOD-6S will need 20-30secs to initialize itself. The SSD (Seven Segment Display – No 2) depicts the initialization status.

#### 2<sup>nd</sup> Step

Choose “*Chanel mode*” by pressing the Channel/Profile button (No 1) and select the output RF channel using the Up/Downs buttons.

#### 3<sup>rd</sup> Step

Choose “*Attenuation mode*” by pressing the Channel/Profile button (No 1) and select output attenuation ( 0dB, -10dB, -25 dB) using the Up/Downs buttons.

#### 4<sup>th</sup> Step

Choose “*Profile mode*” by pressing the Channel/Profile button (No 1) and select Profile number using the Up/Downs buttons. Each modulator must have its unique profile number in the same CATV installation.

For example, select:

- Profile No 1 for the first modulator
- Profile No2 for the second modulator
- ...
- Profile No10 for the 10<sup>th</sup> modulator etc...

\*The HDMOD-6S offers advanced programming features from a PC software via a USB interface.
